SUMMARY

With 5+ years of experience delivering actionable insights for Fortune 500 companies across multiple domains, I specialize in solving complex business problems through advanced analytics, decision science, and applied AI. Strong focus on product thinking, stakeholder collaboration, and building data-driven solutions that drive innovation and impact.

PROFESSIONAL EXPERIENCE

MU SIGMA INC.

Senior Decision Scientist

Bengaluru, IN
Sep 2022 - Present
Oct '24 - Jul '25

Decision Scientist - IV

For a leading US Telecom operator's Product Portfolio and Device Management team,

- Led the development of an AI-driven data analysis tool that converts user queries into SQL, executes them, summarizes and generates insights on demand. This solution reduced analytics turnaround time from days to hours, empowering business users to independently generate insights
- Prompt engineering and Retrieval-Augmented Generation (RAG) to contextualize LLMs with organization-specific terminologies and schema details, enabling the tool to handle complex queries and provide accurate follow-ups
- Built an agentic workflow to automatically summarize and extract key insights from CSV and Excel-based sales and inventory reports, leading to a 25% increase in stakeholder engagement and report consumption
- Built an MVP price prediction model using supervised regression models to estimate used device prices for a telecom trade-in program planning team, thereby improving pricing accuracy

Decision Scientist - III

Jun '23 - Sep '24

For a leading US Telecom operator's Product Portfolio and Device Management Team,

- Led efforts in developing interactive Power BI dashboards and paginated reports for sales, inventory and promotions, replacing legacy excel-based reporting processes. Enhanced data accuracy and operational efficiency by 25% through streamlined reporting workflows
- Built an E2E Python-based web scraping and ETL solution to extract shipment dates and trade-in values for 500+ smartphones, storing results in a SQL database. Integrated network APIs to reduce scraping time from 1 hour to 3 minutes, improving logistics responsiveness
- Conducted Promotional effectiveness analysis by evaluating utilization and spend across product portfolios, and leveraging contract terms to understand commitments made with device manufacturers for funding. Partnered with business teams to define KPIs and built Power BI dashboards to track Promotion Utilization, Spend, and Marketing Development Funds, reducing reporting time for OEM managers by 50%

Decision Scientist - II

Sep '22 - May '23

- Led co-brand credit card acquisition analysis by examining applicant transaction data to uncover drivers behind declining acquisition rates. Identified the root cause for increase in cancellations through deep dive into applicant mix, checkout type, and acquisition channels. Built interactive dashboards, accelerating strategic turnaround by 30%

HYUNDAI MOTOR INDIA

Business Analyst

Chennai, IN
Aug 2019 - May 2022

- Led data-driven analysis of coating film thickness in vehicle manufacturing, resulting in a 25% reduction in quality control rejections by identifying key appearance-impacting factors and communicated insights effectively through interactive Power BI dashboards

EDUCATION

PSG INSTITUTE OF TECHNOLOGY AND APPLIED RESEARCH

Bachelor of Engineering in Mechanical (CGPA : 8.84)

Coimbatore, IN
2015-2019

ADDITIONAL INFORMATION

Technical Skills : SQL, Python (Pandas, NumPy, Scikit-Learn), Data Visualization (Power BI, Matplotlib, Seaborn), Azure OpenAI, LangChain, Snowflake, SQL Server Management Studio, Supervised ML (Regression, Classification), Statistical Testing, RAG, Prompt Engineering, GIT, Microsoft Excel, Azure Data Factory, Databricks

Awards : Recognized with *Impact Awards (2024, 2025)* and *Spot Awards (2023, 2024)* for driving key analytics initiatives like GenAI chatbot, promotion effectiveness and NPI success in telecom and credit card analytics in banking

Certifications : Databricks Certified Data Analyst Associate (2025)
